ANIMATION

Our training courses are appreciated for their dynamism and their participatory aspect. They focus on capsules (presentation of tools), guided discussions and team challenges.

Carried out using all available virtual tools (including sub-groups), our trainings are designed to keep participants in the action.

The dynamism of our workshops is ensured by the variety of animation techniques used: simulation, exchange of ideas, viewing of videos, “virtual” demonstration, reflective activity, self-diagnosis and team mission in sub-groups (to distance).
